

“Working with Organic Housekeepers has raised the benchmark of housekeeping standards in our portfolio of luxurious mountain vacation properties. They meet and surpass many of our expectations on a daily basis and take a great deal of pride in their work in keeping our homes in tip-top condition. I have never worked with a vendor who can communicate so well and is so responsive to our needs, it makes our jobs easier and our clients that much happier on their visits.”

– Greg Ciluzzi,
Exclusive Resorts Residence Manager

“Organic Housekeepers goes above and beyond the call of duty. They’re excellent communicators.”

– Julia Parker,
Christopher-Kendell Property Management

Housekeeping is the backbone of a positive resort experience. It's the cleanliness of a room that either makes or breaks a good first impression. Yet, staffing housekeepers remains an industry challenge.

Organic Housekeepers can solve your cleaning needs

Our trained and dedicated cleaners can serve as your housekeeping staff, or we can help to supplement staffing during peak season.

Why choose Organic Housekeepers?

Our staff: We provide trained, bonded, insured and legal cleaning professionals. We pay them well and have a high retention rate.

Personalized attention: We will dedicate a supervisor to manage your account and to develop a customized checklist to ensure we meet all of your expectations.

Training program: Our staff receives extensive and ongoing training. We teach them cleaning techniques based on efficiency and effectiveness. Clean smarter, not harder is our motto.

We're green, we're local: By choosing a local green cleaning company, it shows the community and your clients that you care about the environment.

Experience: Organic Housekeepers currently services luxury vacation clubs, vacation rentals and hotel penthouses. Hands-on owner Tim Szurgot brings years of cleaning experience. Previously, he's worked in housekeeping departments for Marriott and Manor Vail Resort.

Germ busters: We take great care to eliminate cross-contamination of bacteria. We kill germs with a hydrogen peroxide cleaner. Our staff wears rubber gloves. We use clean mop heads for every home. And we do not use bacteria-harboring sponges.

Supplies and products: Organic Housekeepers provides its own green cleaning products and supplies, including Miele vacuums with HEPA filters.

Tech savvy: We use a high-tech scheduling and invoicing system, and all of our supervisors are equipped with Blackberries to maximize communication with our clients.

Check-out cleans starting at ...

- 1 bedroom —\$30/\$40 with laundry service
- 2 bedroom —\$60/\$85 with laundry service
- 3 bedroom —\$90/\$130 with laundry service

Living the green life with Organic Housekeepers

Organic Housekeepers' mission is to provide communities with quality cleaning in a sustainable way. By choosing to clean with green cleaning products, Organic Housekeepers promotes the idea that positive change in the world begins in the home with making educated and informed choices.

Organic Housekeepers is more than a cleaning company. We are cleaning with a conscience, saving the earth one tub at a time.

Reasons why you should go green:

 Improves indoor air quality. EPA research states that the air inside our home is typically two to five times more polluted than the air outside. Using green cleaning products is one of the easiest ways to clean up your home's air.

 Water safe, fish approved. Toxic chemicals that are flushed down the drain eventually end up in our streams, rivers and oceans, polluting our drinking water and killing the wildlife. You may not want to, but you could drink Organic Housekeepers' products.

 Healthier for our employees. Cleaners who are exposed to harsh chemicals end up having big health problems. Our cleaners are healthier and happier.
